Subject: TEP EE Plan

I want to encourage you to hold off on putting the TEP EE Plan on the ACC agenda. The concern is by voting on increasing the budgets will likely affect the upcoming election. Assuming it is approved by the commission, taxes on the utility bills will go up.....Arizona citizens will not vote for someone who continues to raise their taxes.

Please consider waiting until after the election.

Subject: Tucson Electric Power Company rate increase proposal

Please deny TEP's rate increase request. Their press release says, "The utility also wants a rate mechanism to recoup the cost of lower power sales resulting from new energy-efficiency programs," but can the lower power sales caused by new energy-efficiency programs be accurately calculated and separated from the lower power sales resulting from less customers caused by the abundant vacant structures from the many Tucson businesses going out-of-business. Wouldn't a rate increase cause still lower sales when it forces more businesses to fold and consumers raise their thermostat another degree to keep their electric bill constant? I plan keeping my utility bill budget allowance constant or lower--so, TEP can't get more money from me because I don't have it to give it to them (and many other Tucson residents don't have any additional money for TEP either)!! Also, the cost of electricity of other businesses is incorporated into every other item consumers buy that will cause inflation of prices of everything from an apple to toilet paper which will effect me and others harshly.

Please respond and inform me of how you are planning on voting as I plan on voting in November.

Thank You,
Nancy
